General Data Protection Awareness Training

ONE OF THE BIGGEST THREATS TO OUR BUSINESS IN 2018 - IMPORTANT PLEASE READ

The General Data Protection Regulation (GDPR) will come into force on the 25th of May 2018, replacing the existing data protection framework under the EU Data Protection Directive.

Individuals, companies or organisations found by the Data Protection Commissioner (DPC), in breach of these data compliance regulations face huge penalties, **with fines up to €20m or 4% of their global turnover – whichever is higher.**

It's easy to forget that everyone, every single day handles personal data. For example, every time an employee performs a credit card transaction with a customer or holds a home address they are handling an individual's personal data. Make no mistake, this is the biggest threat to your business in 2018
